

Science Club at RTS

Our science ambassadors play an active role in Science at RTS. They run Science club for year 2 pupils.

Each ambassador works with the children. Questioning the children throughout and encouraging the children to find the answers themselves.

"Science club is really fun we get to do lots of investigations".

The ambassadors plan and deliver question based investigations with the support of the Subject leader.

"Science is my favourite subject and I love showing the younger children how exciting it is".

"I like science club because I like working with the Science ambassadors. They help me."

The ambassadors created their own 'Scientist of the Week' certificate, This was a great incentive to club members.
